Thanks for that.. but i think i have an one-click cracker because i am the person who have cracked all the other legit software's with one click crack.. and i found out that there is a "one click crack" web site which give us on click crack software.. the question is what is the web address on that site i have to visit? it will be very much helpful for me if you guys tell me... thanks!! I have asked this question in one of the previous comments on the page above and was told to email the developer of the software. You can download the portable version of the program from the link below. If you decide to purchase the full version, you can download a fully protected installer from the link below. Just purchased this product and tested it on my test PC. While the full version worked, for some reason, the portable version (exe-joiner.exe) was unable to create the portable.exe. Anyone else have this problem? Contacting the developer, Ben, didn't lead to much in the way of feedback, so I'll just leave the comment here: "Thanks for buying my app, I'm really sorry about this, I really should have made the portable version work properly. I'll be fixing this soon, should be in the next update" I would also like to point out that this review is incorrect. The product was created only a couple of months ago and the issues that some people are reporting are as a result of this. The portable version has been fixed and works perfectly! I don't know if you have ever experienced this, but when I install this, I get a Windows Error saying "Windows could not find the file" or something like that. I don't think I had this problem with the previous version. If I'm going to spend the money on this program, I don't want to have to go back

There is a dedicated GPU. I've got the 16
