We sincerely hope that you will find it useful.Aerial adhesives are commonly used for a variety of purposes, such as to bond construction materials, to serve as sealants, to mark construction jobsites, or for various other purposes. Because of the dangerous nature of certain such materials and the need to avoid the spread of these materials, it is important that the materials remain in a single, self-contained package. Accordingly, adhesive containers and dispensers have been developed that prevent a pair of components from being opened and a dispensed amount of adhesive from spreading to become an unneeded second component.
